- Papelera de alta capacidad con sombrero.
- Fabricada en acero, tratada con el proceso FERRUS\*.
- Acabado color Negro Forja y Marson.
- Cubeta galvanizada y apagacigarrillos en acero inoxidable.
- Tornillería en acero inoxidable.
- Fijación recomendada mediante cuatro pernos de expansión M10.

- Corbeille de grande capacité avec couvercle.
- Fabriquée en acier, traitée avec le procédé FERRUS\*.
- Finition de couleur noir forgé et marson.
- Bac galvanisé et porte-cigarettes en acier inoxydable.
- Vis en acier inoxydable.
- Fixation recommandée avec quatre boulons d'expansion M10.

- High-capacity litter bin with shade cover.
- Made of steel, treated with the FERRUS\* process.
- Forged black and Marson coloured finish.
- Galvanised bucket and stainless-steel cigarette stubber.
- Stainless steel nuts and bolts.
- Recommended fixing with four M10 expansion bolts.

- Cestino per i rifiuti di alta capacità con cappello.
- Fabbricato in acciaio, trattato con il processo FERRUS\*.
- Colore finitura nero forgia e marson.
- Recipiente zincato e spegnisigarette in acciaio inox.
- Viteria in acciaio inossidabile.
- Fissaggio consigliato con quattro tasselli a espansione M10.

- Mesa fabricada en acero corten de 8 milímetros y madera de pino tratada con autoclave.
- Con cubeta galvanizada.
- Tornillería en acero inoxidable.
- Fijación recomendada mediante varillas roscadas embebidas en hormigón M10.

- Table fabriquée en acier corten de 8 millimètres et en bois de pin traité en autoclave.
- Comprend un bac galvanisé.
- Vis en acier inoxydable.
- Fixation recommandée au moyen de tiges filetées noyées dans le béton M10.

- Table made of 8-millimetre Corten steel and autoclave-treated pine wood.
- With galvanised bucket.
- Stainless steel nuts and bolts.
- Recommended fixation using M10 threaded rods embedded in concrete.

- Tavolo in acciaio corten da 8 millimetri e legno di pino trattato in autoclave.
- Con recipiente zincato.
- Viteria in acciaio inossidabile.
- Fissaggio consigliato mediante barre filettate annegate nel calcestruzzo M10.

H214

- Pilona fabricada en acero, tratado con el proceso FERRUS\*.
- Acabado color Negro Forja.
- Aro embellecedor en acero inoxidable.
- Se presenta con distintas opciones de fijación.

- Borne fabriquée en acier, traité avec le procédé FERRUS\*.
- Finition de couleur noir forgé.
- Anneau décoratif en acier inoxydable.
- Elle existe avec différentes options de fixation.

- Bollard made of steel, treated with the FERRUS\* process.
- Forged black coloured finish.
- Stainless steel trim ring.
- Comes with different securing options.

- Dissuasore in acciaio, trattato con il processo FERRUS\*.
- Finitura di colore nero forgia.
- Anello decorativo in acciaio inossidabile.
- Si presenta con diverse opzioni di fissaggio.

# Pilona fija de alta seguridad

HS1200 | HS1500

- Pilona fabricada en acero inoxidable.
- Diseñada para impedir el paso de vehículos de forma permanente.

- Borne fabriquée en acier inoxydable.
- Conçue pour empêcher de façon permanente le passage des véhicules.

- Bollard made of stainless steel.
- Designed to permanently block the passage of vehicles.

- Dissuasore fabbricato in acciaio inossidabile.
- Progettato per impedire il passaggio di veicoli in modo permanente.

**Pilona fija de alta seguridad Ø220 y espesor del tubo de 8mm**  
Borne fixe de haute sécurité, Ø220 et épaisseur du tube de 8mm  
High-security fixed bollard, Ø220 and 8mm thick tube  
Dissuasore fisso di alta sicurezza Ø220 e spessore del tubo di 8 mm

# Petrus

H374 | H374L

- Pilona fabricada en prefabricado de hormigón.
- Acabado fino.
- Opcional con corona luminosa LED.
- Anclaje recomendado con taco químico, mediante tres pernos atornillables en la base de la pilona.

- Borne fabriquée en béton préfabriqué.
- Finition lisse.
- Couronne lumineuse LED en option.
- Ancrage recommandé avec un support chimique, au moyen de trois boulons à visser dans la base de la borne.

- Bollard made of prefabricated concrete.
- Fine finish.
- Optional with LED top light.
- Recommended to be secured using a wall plug, with three bolts that can be screwed into the base of the bollard.

- Dissuasore in prefabbricato di cemento.
- Finitura fine.
- Opzionale con corona luminosa a LED.
- Ancoraggio raccomandato con tassello chimico, mediante tre bulloni avvitabili alla base del dissuasore.

# MATERIALES

MATÉRIAUX | MATERIALS | MATERIALI

## ReBnew

### Plástico reciclado 100% procedente de residuo urbano, industrial y doméstico

El mobiliario de plástico reciclado nos permite volver a dar utilidad a los residuos urbanos, transformando el plástico que iba a ser destruido en materia prima para nuevos usos como, por ejemplo, mobiliario urbano reciclado. Mediante un proceso robotizado de fabricación se modela el material y se fabrican los componentes. La capacidad de procesamiento es de 3.000 tn/año, y el resultado son papeleras, bancos, bolardos, mesas pícnic... Materiales que resisten la intemperie, orines, salitre y que no se oxidan. En caso de vandalismo, al final de su vida útil, son de nuevo reciclados.

### Plastique 100 % recyclé à partir de déchets urbains, industriels et ménagers

Le mobilier en plastique recyclé nous permet de réutiliser les déchets urbains, en transformant le plastique qui devait être détruit en matière première pour de nouvelles utilisations telles que le mobilier urbain recyclé. Un processus de fabrication robotique est utilisé pour modéliser le matériau et fabriquer les composants. La capacité de traitement est de 3 000 tonnes par an, et le résultat est constitué de corbeilles à papier, de bancs, de bornes, de tables de pique-nique... Des matériaux résistants aux intempéries, à l'urine, au salpêtre et qui ne rouillent pas. En cas de vandalisme, ils sont recyclés à nouveau à la fin de leur vie utile.

### 100% recycled plastic from urban, industrial and domestic waste

Recycled plastic furniture allows us to make urban waste useful again, transforming the plastic that was going to be destroyed into raw material for new uses, such as recycled urban furniture. Using a robotic manufacturing process, the material is moulded, and the components are manufactured. The processing capacity is 3,000 t/year, and the result is litter bins, benches, bollards, picnic tables... Materials that are resistant to weathering, urine, saltpetre and that do not rust. If vandalised, they are recycled again at the end of their useful life.

### Plastica riciclata al 100% derivante da rifiuti urbani, industriali e domestici

Gli arredi in plastica riciclata ci consentono di riutilizzare i rifiuti urbani, trasformando la plastica che doveva essere distrutta in materia prima per nuovi usi, come appunto gli arredi urbani. Mediante un processo di produzione robotizzato, il materiale viene modellato per fabbricare i componenti. La capacità di lavorazione è di 3.000 tonnellate/anno e il risultato sono cestini per rifiuti, panchine, dissuasori, tavoli da picnic ecc. Materiali che resistono alle intemperie, all'urina, al salnitro e che non si ossidano. In caso di vandalismo, possono essere nuovamente riciclati al termine della loro vita utile.

## Madera de pino tratada

### MADERA TRATADA EN AUTOCLAVE

El sistema de doble vacío en autoclave es el más eficaz para tratar maderas que puedan estar expuestas a la acción de los xilófagos, además de las condiciones más desfavorables para su durabilidad.

### BOIS TRAITÉ EN AUTOCLAVE

Le système d'autoclave à double vide est le plus efficace pour traiter le bois qui peut être exposé à l'action des xylophages, en plus des conditions les plus défavorables à sa durabilité.

### AUTOCLAVE-TREATED WOOD

The double vacuum autoclave system is the most effective for treating wood that may be exposed to the action of xylophages, as well as the most unfavourable conditions for its durability.

### LEGNO TRATTATO IN AUTOCLAVE

Il sistema di autoclave a doppio vuoto è il più efficace per trattare legni che possono essere esposti all'azione degli xilofagi, oltre che a condizioni più sfavorevoli per la loro durata.

## Madera tropical

### ACABADO COLOR NATURAL

Madera exótica procedente de explotaciones responsables en bosques tropicales. Son maderas muy resistentes a la intemperie y a la humedad, cuya calidad viene determinada por su densidad, su humedad y el tratamiento que se le ha aplicado.

### FINITION COULEUR NATURELLE

Bois exotique issu d'exploitations responsables dans les forêts tropicales. Ces bois sont très résistants aux intempéries et à l'humidité et leur qualité est déterminée par leur densité, l'humidité et le traitement qui leur est appliqué.

### NATURAL COLOUR FINISH

Exotic wood from responsible exploitation in tropical forests. These woods are highly resistant to weathering and humidity, the quality of which is determined by their density, humidity and the treatment applied to them.

### FINITURA DI COLORE NATURALE

Legno esotico proveniente da raccolta responsabile in foreste tropicali. Si tratta di legni molto resistenti agli agenti atmosferici e all'umidità, la cui qualità viene determinata dalla densità, dall'umidità e dal trattamento applicato.

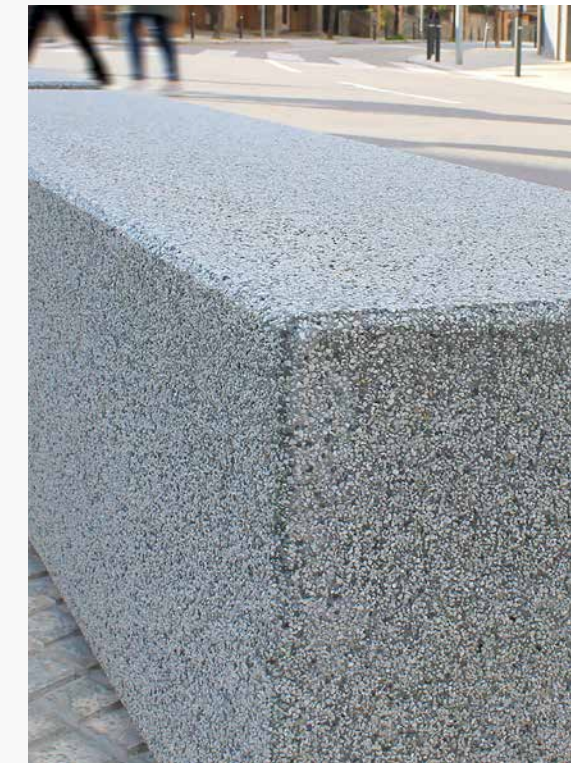

## Hormigón

El hormigón es el producto resultante de la mezcla de un aglomerante (generalmente cemento, arena, grava o piedra machacada y agua) que, al fraguar y endurecer adquiere una resistencia similar a la de las mejores piedras naturales.

Le béton est le produit résultant du mélange d'un agglomérant (généralement du ciment, du sable, du gravier ou de la pierre concassée et de l'eau) qui, lorsqu'il prend et durcit, acquiert une résistance similaire à celle des meilleures pierres naturelles.

Concrete is the product resulting from the mixture of a binder (generally cement, sand, gravel or crushed stone and water) that, when it sets and hardens, acquires a resistance similar to that of the best natural stones.

Il calcestruzzo è il prodotto risultante dalla miscelazione di un agglomerante (solitamente cemento, sabbia, ghiaia o pietra frantumata e acqua) che indurendosi acquisisce una resistenza simile a quella delle migliori pietre naturali.

## Acero corten

### CORTEN STEEL

El acero corten es un tipo de acero cuya composición química hace que su oxidación tenga características especiales que protegen la pieza contra la corrosión atmosférica. El grado de exposición influye mucho en el proceso de formación de la capa protectora. Si se expone directamente a la lluvia, al sol y al viento, la capa de óxido se formará más rápido que si se protege. En este último caso, el óxido tiende a ser más rugoso, algo menos denso y uniforme.

### CORTEN STEEL

L'acier corten est un type d'acier dont la composition chimique fait que son oxydation présente des caractéristiques particulières qui protègent la pièce contre la corrosion atmosphérique. Le degré d'exposition influence grandement le processus de formation de la couche protectrice. En cas d'exposition directe à la pluie, au soleil et au vent, la couche de rouille se forme plus rapidement que si le matériau est protégé. Dans ce dernier cas, la rouille a tendance à être plus rugueuse, un peu moins dense et uniforme.

### CORTEN STEEL

Corten steel is a type of steel whose chemical composition means that its oxidation has special characteristics that protect the piece against atmospheric corrosion. The degree of exposure has a great influence on the formation of the protective layer. If it is directly exposed to rain, sun and wind, the oxide layer will form faster than if it is protected. In the latter case, the rust tends to be rougher, somewhat less dense and uniform.

### ACCIAIO CORTEN

L'acciaio corten è un tipo di acciaio la cui composizione chimica fa sì che la sua ossidazione abbia caratteristiche speciali che proteggono il pezzo dalla corrosione atmosferica. Il grado di esposizione influenza notevolmente il processo di formazione dello strato protettivo. Con una diretta esposizione a pioggia, sole e vento, lo strato di ossido si formerà più velocemente di quanto farebbe in presenza di protezione. Nel secondo caso, l'ossido tende a essere più ruvido, un po' meno denso e meno uniforme.

# TRATAMIENTOS

## TRAITEMENTS | TREATMENTS | TRATTAMENTI

### TRATAMIENTO DE PROTECCIÓN A LA CORROSIÓN DEL HIERRO

Proceso protector del hierro que garantiza una óptima resistencia a la corrosión.

### TRAITEMENT DE PROTECTION CONTRE LA CORROSION DE L'ACIER

Processus protecteur de l'acier garantissant une résistance optimale à la corrosion.

### PROTECTIVE TREATMENT AGAINST IRON RUSTING

Protection process that guarantees a high resistance to rust.

### TRATTAMENTO DI PROTEZIONE CONTRO LA CORROSIONE DEL FERRO

Processo di protezione del ferro che garantisce una resistenza ottimale alla corrosione.

#### 1. Granallado

En esta fase se eliminan todo tipo de suciedades, oxidaciones, calamina, aceites etc... mediante un tratamiento mecánico para eliminar las películas de óxido,

#### 1. Grenaillage

Cette étape consiste en l'élimination de tout type de saleté, oxydation, calamine, huile, etc., qui requièrent l'application d'un traitement mécanique afin d'éliminer les pellicules d'oxyde.

#### 1. Shot peening

This phase consists in eliminating all kinds of dirt, rust, calamine, oil, etc., which require the application of mechanical treatment to remove oxide films.

#### 1. Sabbiatura

In questa fase vengono rimossi tutti i tipi di sporcizia, ossidi, calamina, oli ecc. per la cui eliminazione è necessario un trattamento meccanico.

#### 2. Cataforesi

Se aplica un recubrimiento de pintura por inmersión utilizando corriente eléctrica para depositarla. Las partículas de pinturas son atraídas hacia la pieza y la pintura es depositada en ésta formando una capa uniforme.

#### 2. Cataphorèse

Cette technique consiste à plonger la pièce métallique dans un bain pour y déposer un revêtement de peinture par électrolyse. Les particules de peinture sont attirées vers la pièce et la peinture se dépose sur celle-ci en formant une couche uniforme.

#### 2. Cataphoresis

This technique consists in immersing the metallic part in a chemical bath to coat it by electrodeposition. The paint particles are attracted to the part and the paint is deposited on it, forming an even layer.

#### 2. Cataforesi

Applicazione di rivestimento di vernice per immersione, coadiuvata da corrente elettrica. Le particelle di vernice vengono attratte dal pezzo e la vernice si deposita su di esso formando uno strato uniforme.

#### 3. Imprimación

Se aplica una imprimación en polvo epoxy con un alto contenido en zinc.

#### 3. Apprêt

Application d'un apprêt poudre époxy à haute teneur en zinc.

#### 3. Primer

Application of an epoxy powder primer coating with a high zinc content.

#### 3. Imprimitura

Viene applicato un primer in polvere epossidica ad alto contenuto di zinco.

#### 4. Pintura poliéster

Para terminar, se aplica un revestimiento de pintura poliéster en polvo acabado color oxirón negro forja, obteniendo una doble función: estética y de protección.

#### 4. Peinture polyester

Pour terminer, on applique un revêtement de peinture poudre polyester finition coloris oxiron noir forge, ayant une double fonction : esthétique et de protection.

#### 4. Polyester paint

Application of a forge black oxiron polyester powder coating finish, with a double function: aesthetic and protective.

#### 4. Vernice in poliester

Infine, viene applicato un rivestimento di vernice in polvere di poliester con finitura oxiron nero forgia per ottenere un doppio risultato: estetico e di protezione.

### PROCESO DEL TRATAMIENTO DE LA MADERA

Disponemos de unas instalaciones equipadas con la última tecnología en recubrimientos, que garantizan el tratamiento más adecuado en función del tipo de material en el que se ha realizado el producto y el posterior uso del mismo.

### PROCESSUS DE TRAITEMENT DU BOIS

Nous disposons d'installations équipées avec la toute dernière technologie en termes de revêtements, afin de garantir le traitement le plus adéquat en fonction du matériau de fabrication du produit et de son utilisation ultérieure.

### WOOD TREATMENT PROCESS

We have facilities equipped with the latest technology in coatings that guarantee the most appropriate treatment, depending on the type of material used to manufacture the product and its subsequent use.

### PROCESSO DI TRATTAMENTO DEL LEGNO

Disponiamo di strutture attrezzate con le più recenti tecnologie di rivestimento che garantiscono il trattamento più appropriato in base al tipo di materiale in cui è stato realizzato il prodotto e al suo successivo utilizzo.

### PROTECTOR ANTIGRAFFITI

Revolucionario protector del material de pinturas y rotulaciones, que además de proteger el mobiliario urbano regenera el aspecto inicial.

- Cumplen con los requerimientos de limpieza según la Norma ASTM D 6578 (práctica para la determinación de Resistencia al Grafiti)
- Uso interior y exterior sobre metal, plástico, madera...
- Soporta varios ciclos de limpieza.
- Composición y tratamiento respetuoso con el medio ambiente.
- Excelente resistencia química (disolventes, ácidos, bases)
- Excelente resistencia al rayado.

### PROTECTION ANTI-GRAFFITI

Protection révolutionnaire contre les graffitis, peintures et tags qui, en plus de protéger le mobilier urbain, régénère son aspect originel.

- Conforme aux exigences prévues par la Norme ASTM D 6578 (mesure de la résistance aux graffitis).
- Usage intérieur et extérieur sur métal, plastique, bois...
- Supporte plusieurs cycles de nettoyage.
- Composition et traitement respectueux de l'environnement.
- Excellente résistance chimique (dissolvants, acides, bases).
- Excellente résistance aux rayures.

### ANTI-GRAFFITI PROTECTOR

Revolutionary material protector against graffiti and paints which, apart from protecting street furniture, regenerates its original aspect.

- Complies with the requirements of the ASTM D 6578 standard (practice for determination of graffiti resistance).
- Interior and exterior use on metal, plastic, wood...
- Lasts several cleaning cycles.
- Eco-friendly composition and treatment.
- Excellent chemical resistance (solvents, acids, bases).
- Excellent resistance to scratches.

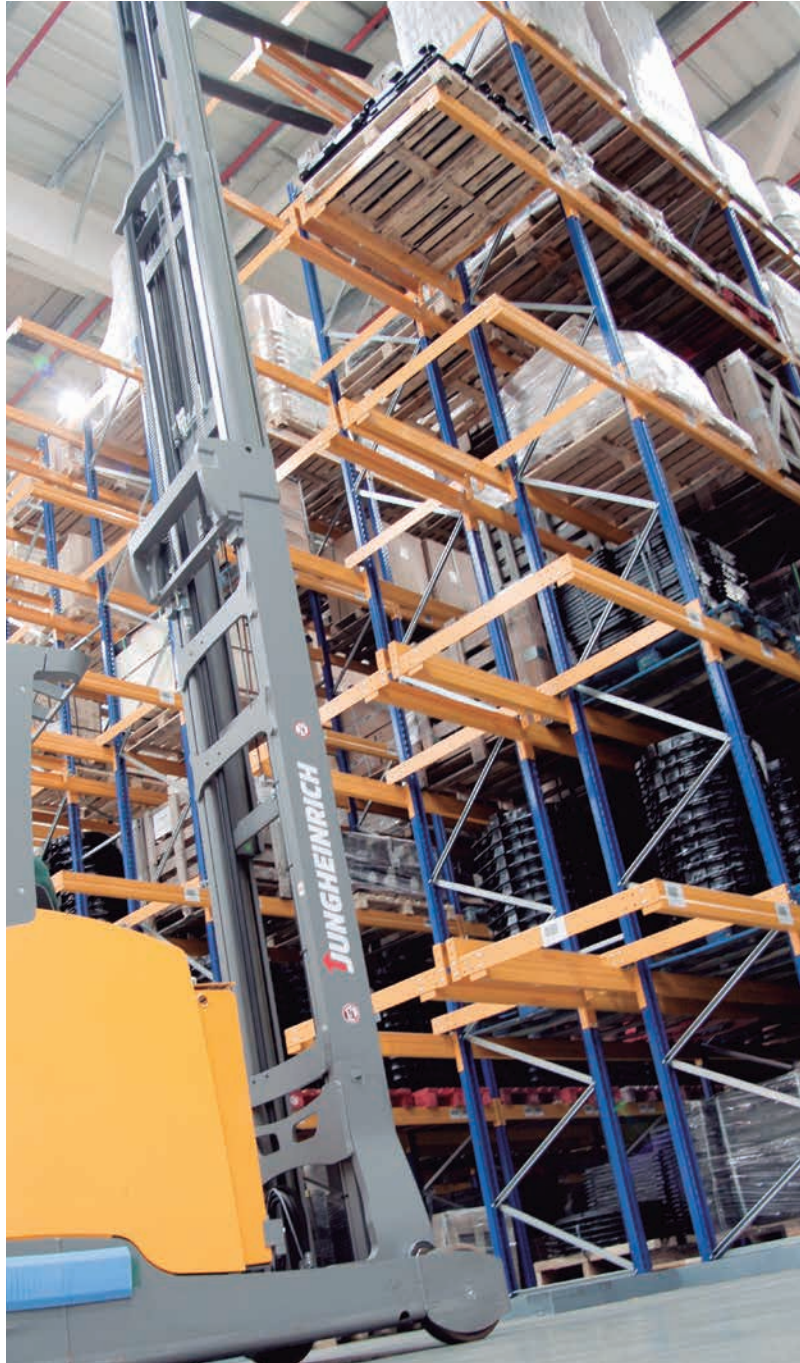

### PROTETTORE ANTIGRAFFITI

Rivoluzionario protettore del materiale di vernici e insegne che, oltre a proteggere l'arredo urbano, ne ripristina l'aspetto iniziale.

- Soddisfa i requisiti di pulizia secondo la Norma ASTM D 6578 (pratica per la determinazione di resistenza ai graffiti)
- Uso in interni ed esterni su metallo, plastica, legno...
- Resiste a diversi cicli di pulizia.
- Composizione e trattamento rispettoso dell'ambiente.
- Eccellente resistenza chimica (solventi, acidi, basi)
- Ottima resistenza ai graffi.

**BENITO URBAN dispone de un centro operativo de 125.000m2 que alberga instalaciones de primer nivel y está automatizado con los sistemas más avanzados en el ámbito logístico. La filosofía de trabajo se basa en el “lean warehousing”, lo que permite la gestión de operaciones de gran envergadura, ofreciendo servicios inmediatos y plazos de entrega garantizados.**

BENITO URBAN dispose d'un site opérationnel de 125 000 m2 hébergeant des installations de premier ordre et automatisé avec les systèmes les plus avancés dans le domaine de la logistique. Sa philosophie de travail repose sur le « lean warehousing », ce qui permet la gestion d'opérations de grande envergure, en proposant des services immédiats et des délais de livraison garantis.

BENITO URBAN has an operating centre occupying a surface area of 125,000 m2, with first-class facilities and automatised with the most advanced systems in the logistics field. Its work philosophy is based on 'lean warehousing', which makes it possible to manage large-scale operations, providing immediate services and guaranteed delivery times.

BENITO URBAN dispone di un Centro Operativo di 125.000 m2 che ospita strutture di prim'ordine, automatizzate con i sistemi più avanzati nel campo della logistica. La nostra filosofia di lavoro si basa sul 'lean warehousing', che consente di gestire operazioni su larga scala, offrendo servizi immediati e tempi di consegna garantiti.

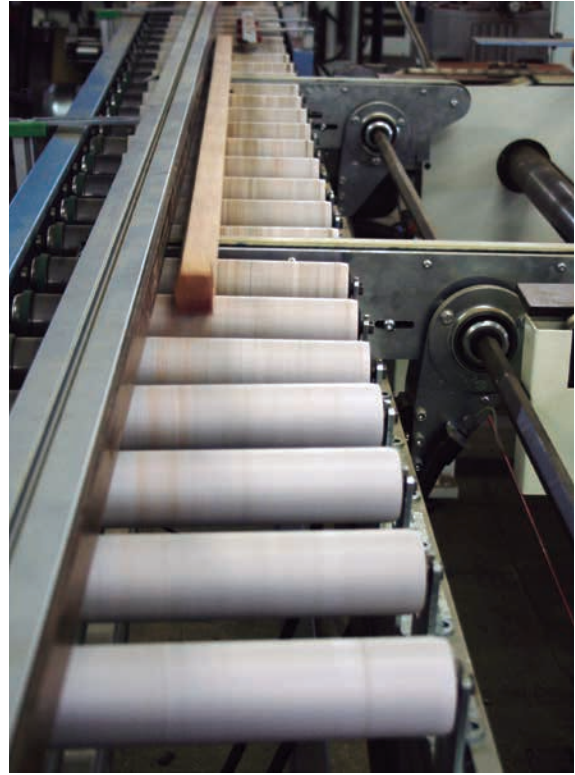

**En BENITO URBAN somos fabricantes y controlamos todo el proceso productivo, desde el diseño del producto hasta su fabricación y posterior venta. Destaca nuestra apuesta por la innovación e integración de nuevas tecnologías para conseguir procesos de producción más eficientes y respetuosos con el medioambiente.**

Chez BENITO URBAN, nous sommes fabricants et nous contrôlons l'ensemble du processus de production, de la conception du produit jusqu'à la vente en passant par la fabrication. Nous misons sur l'innovation et l'intégration de nouvelles technologies afin d'assurer des processus de production toujours plus efficaces et respectueux de l'environnement.

At BENITO URBAN, we are manufacturers and therefore control the whole production process, from product design until manufacturing and sales. We stand out for our commitment towards innovation and the integration of new technologies in order to ensure more efficient and eco-friendly production processes.

Da BENITO URBAN siamo produttori e gestiamo l'intero processo produttivo, dalla progettazione del prodotto alla sua realizzazione e successiva vendita. Siamo impegnati nell'innovazione e nell'integrazione di nuove tecnologie per ottenere processi produttivi più efficienti e rispettosi dell'ambiente.
